

# MODEL SG-40H

## Track Stump Grinder

The Bandit SG-40H is a **compact, all-terrain machine** suiting the needs of multiple stump grinding professionals. **Key features** on the SG-40H include a belt-less cutter wheel drive system, enhanced operator visibility, efficient machine travel speed, and high maneuverability.

### CUTTER WHEEL DRIVE

The Bandit SG-40H comes equipped with the same features found on the popular SG-40, but what differentiates these two machines apart is the cutter wheel drive system. The SG-40H is driven by a hydraulic motor mounted on the side of the cutter wheel eliminating the need to conduct periodic belt maintenance.

### OPTIMAL VISIBILITY

Operator controls are mounted on a 3-position console. So, no matter the position of the stump, you'll be able to get an excellent view of the grinding action. Two joysticks control the travel of the unit, while a single, easy to use joystick controls all cutter wheel functions. This set-up allows an operator to efficiently control all functions increasing versatility and productivity.

### AGGRESSIVE CUTTING ACTION

The SG-40H sets the bar high in this size grinder category. The aggressive cutter wheel powers through stumps with ease. Available cutter wheel options include a Bandit wheel with Greenteeth or a New Revolution wheel with hex teeth, allowing users to choose the configuration that best suits their needs.

### DURABLE TRACK DRIVE SYSTEM

The track drive system is designed to travel over various terrain conditions. The turf-friendly tracks are designed to leave minimal footprint and onsite damage. When track tension maintenance is needed, this is simply done by utilizing the adjuster bolts on each side of the tracks.

### POWERFUL EFI ENGINE

Powerful EFI gasoline engine is easy to start, operate, and provides ample torque to power the cutter wheel through stumps of various sizes.
